

**Title: Experiences with Zoom lesson
(Hints or experiences shared for Zoom lessons)**

Target: Teacher and Parent

Abstract of the Movie:

The teacher and 3 students of Hau Po Woon Primary School shared their preparations, practices, e-resources, and strategies as well as the pros and cons of online lessons in school. It is worth taking into account by the parents / teachers while they conduct their own Zoom lessons or online learning.

Advice for the Post-movie Activities:

Please take reference to the advice / experiences from teachers and students of Ching Chung Hau Po Woon Primary School while you conduct your online teaching and learning via Zoom lesson. Some points are summarized below:

1. Students are easily distracted at home and thus you should keep students engaged in lessons to make them fun and interactive by getting them to talk and share ideas, find materials online or make presentations with frequent use functions in Zoom in the online lesson.
2. Teachers / parents should integrate different e-learning tools and e-resources such as Padlet, Quizlet and Book Creator to design interactive e-materials or funny learning games for teaching and learning online.
3. Teachers can use the recording function in Zoom or the communication function in Google Classroom to cater to students with learning diverse needs.
4. Teachers / parents should always be aware or ensure rare technical problems aroused to avoid the influence of Zoom lessons.
