

Title: Reading Across Curriculum (RAC)
(Broaden students' knowledge base in different subjects)

Target: Teacher and Parent

Abstract of the Movie:

Ms. Cheryl, the teacher of Hau Po Woon Primary School shared the practices of their school-based reading curriculum to promote the RAC to cater for students in diverse needs, to expose students with more different kinds of readers as well as different vocabulary levels, and nurture students' motivation and habit in reading. Schools would also provide differentiated reading and link with other programs like PLP readers or GE program with the same theme to help less able students to build up their vocabulary levels for different kinds of reading.

The movie also included a student Mark's book sharing as an example for RAC. Mark shared:

1. the title, author and the brief of the book;
2. what are learnt and own ideas from the book;
3. the favorite part of the book;
4. the learning related to English;
5. the kinds of books I enjoyed reading.

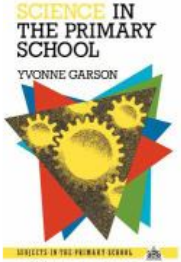

Mark also demonstrated reading aloud some parts of his favorite book in the movie.

Advice for the Post-movie Activities:

Herewith commented lists of English readers in different subjects for RAC in school / home because the readers can be borrowed from the Hong Kong Public Library.
