

## Title: Learning English with Confidence

Target: Primary teachers / parents

(How to facilitate children learning English with confidence and interest)

Abstract of the Movie:

Teachers of Shek Wu Hui Public School would design certain lesson activities for students with opportunities to express themselves or even stand out for presentation. Students also got opportunities to answer questions even in online lessons to show their confidence. Besides, teachers would offer suitable appreciation to positively reinforce students. Teachers would also invite the passive students to try and learn from mistakes rather than just in dread. Teachers wanted students' inquiries and learnt actively. Teachers would prepare some simple questions for passive students to enforce their confidence. Moreover, teachers addressed that students would love to learn once they thought they liked the teachers. It was also important for students to help each other and learn mutually. Teachers would add the team with marks to encourage mutual learning.

Advices for the Post-movie Activities

Reference to the hints by teachers of Shek Wu Hui Public School, teachers / parents can launch the following activities daily for children to express themselves and practice English and thus strengthen their confidence:
