

Title: How to help your kids to learn English

Target: Parent

Abstract of the Movie:

In the first part of the interview, Ms. MAN Sze Wing Jessica, the Principal of PLK Lam Man Chan English Primary School, advised parents to use English songs to help children start to learn English. Her school established an open YOUTUBE channel with English songs rewritten and re-sing by own to help students in learning English.

In the second part of the interview, the two officer teachers shared that students would sing an English song every day, or select songs from the school YOUTUBE channel in order for the encouragement of self-directed learning with English songs.

The teachers also advised parents to help children with the start at their interests. Encourage children to try without fear of making mistakes. They should learn from wrong doing. Parents should search for children interested or related topics as well as their related English information or sources. They then help children learn this information through some sort of game. Parents should also justify their expectations to children and give more appreciation for their progress. Teachers encouraged the school and parent co-operation and parents can seek more advice from teachers.

Advices for the Post-movie Activities

1. Learn English with Songs

Parents should use the following recommended songs to listen and sing with your children and thus learn the English:
